

Interiors Division

**PROCESS EQUIPMENT
& CONTROLS**

Our design-build approach offers a complete solution for your interior construction or renovation, from initial planning through every phase of construction, ensuring a hassle-free experience

Design-Build Service

From the ground-up, our accomplished engineers and construction experts will design and execute your interior build-out or renovation project. PEC Interiors Division offers building owners and tenants a turn-key solution – efficient, affordable, reliable, and most of all simple.

Custom Designed Spaces

PEC's Interiors Division can custom design and build-out any space to meet your business needs. From commercial, industrial, and professional offices, to warehouses, factories, and even retail spaces, no project is beyond our scope of experience or capability. Start to finish, we'll meet your requirements and exceed expectations.

A one-stop-shop for any commercial build-out. PEC provides design and installation services for drywall, metal stud framing, specialty wall panels, acoustic ceilings, insulation, electrical, lighting, flooring, painting and more.

The PEC-plus:

- Schedule driven performance to push other trades
- Qualified on-site supervision at all times
- Single point of accountability

Expert Project Management

Trained and OSHA certified, our professional project managers are on-site to coordinate and execute your entire project from the earliest planning stages to the very last finishes, addressing issues quickly and ensuring a seamless experience.
